| <b>2.</b> | <p><b>CSURMA Benefits Program Renewal</b></p>                                                                                                                                                     |

- In the marketplace we have continued to see double digit renewals as a result of several factors. Including rising healthcare costs, increased pharmacy costs, high costs claims including increased cancer claims, and although inflation is decreasing, the healthcare marketplace still is seeing the impact of inflation over the years.
- Advancement in technologies and therapies that are life saving but costly continue to impact renewal rates.
- PRISM is the second largest JPA in the state of California, with 45,000 subscribers and 93,000 members. Unlike carrier programs, there is no profit so the vast majority of premium dollars that go into PRISM are dedicated to paying claims.
- The goal of the program is to keep health care costs lower and decrease volatility. Although the program is not completely insulated from marketplace increases, the pools are designed to mitigate what is happening in the broader marketplace.
- This PRISM renewal is calculated from claims through February 2025. The medical trend component is 7%, pharmacy 14%.
- The PRISM renewal is blended, and the blended rate is 14.24%. The CSURMA renewal has historically been slightly different than the PRISM pool and that is no different this year. The CSURMA renewal is 14.8%. Although this is a bit more volatility than we would like to see it still outpaces the California PPO pool renewal and the PERS PPO renewal.
- Aside from the top renewal of 14.8% all other renewals are either in a rate guarantee, rate pass, or have a renewal decrease.
- With all lines of coverage combined, the 2026 renewal is a 13.2% increase.
- The five-year history for CSURMA is 6.9%
- CSURMA had a couple of years where renewals were adjusted for CPRA but in the last two years CSURMA did not receive a CPRA adjustment because they have been running similar to the PRISM pool.
- The ancillary 5-year history has remained either zero or negative.
- PRISM provides utilization details which is not the norm for other pools. This data can help members to understand what is driving the renewal increase and understand what percent of premium paid is being used to pay their claims.
- GLP-1's have been driving pharmacy costs up. 4/5 of the top medications are GLP-1's. The number of GLP-1 users is almost doubling yearly.
- Specialty medication went up 33%

#### **Renewal Drivers & New Programs**

- PRISM is implementing two new programs to help mitigate costs.
- Digbi Health will be the new diabetes management program starting 1/1/2026.
  - Available to all non-Kaiser members.
  - The goal is to use food as medicine and tailor the program to each individual's needs.

The way that CSURMA is set up, that is not a possibility.</li> <li>• BCC has offered to do training with auxiliaries who are interested to discuss pulling reports to assist in making the process of entering information into both your payroll system and BCC.</li> <li>• Alliant will work with BCC to address the concerns with reports. The committee noted that OE reports are not provided until the end of October which can make entering into their payroll system a little more challenging. Also, that pulling reports is not simple and it is hard to know what needs to be selected to pull the appropriate report.</li> </ul> <p><b>Next Steps</b></p> <ul style="list-style-type: none"> <li>• The vote for renewal will be June 30<sup>th</sup>.</li> <li>• Renewal letters will be sent to auxiliaries right after the next committee meeting. Signed renewal letters need to be returned to the Alliant team by July 24<sup>th</sup>.</li> <li>• Ancillary only auxiliaries have a little more time to finalize any plan changes as their system is a little different than those on Medical.</li> <li>• The committee inquired about other benefit administration systems and Chloe said there are other options through PRISM but with how difficult a ben admin change would be, we think it is in the best interest of CSURMA to discuss with BCC how we can work out the reporting issues that CSURMA is having before looking into other ben admins.</li> </ul> |
